O-RING REFERENCE GUIDE

SPX FLOW is pleased to release a new O-ring selection guide which is available for download on the SPX FLOW [website](#) and for hard copy order on the CCI-OneTouchPoint literature fulfillment [site](#).

Reference guide details:

- Consists of two-pages which outline the O-ring identifying color schemes on the front side, along with a suggested elastomer application guide on the back.
- ***This O-ring color scheme is used on WCB Pumps and Valves only*** and is designed for both distributor and end-user use. Please forward the guide to your pump and valve customers for quick reference.

This is an excellent tool for elastomer selection. Save the pdf file from the website or order your printed copies today!!
