

PROJECT ENGINEER

Location: Greensboro, N.C.

We seek an engineer with a background in food and/or fluid processing. Experience in the dairy, beverage, food or bio-pharm industries is preferred. The engineer will have responsibility for working with sales, customer, and contractor representatives to design, cost, develop installation schedules, procure materials, install, start-up and train on assigned projects. Development of creative solutions to customer processing challenges is required. Travel to customer facilities in the division area is required and is dependent on project load. Travel averages 35% of the time.

This position requires a BS degree in engineering; 2 – 6 years' experience. Candidate must have good verbal and written communication skills. AutoCAD skills are required to develop P&ID and piping layout drawings. The engineer will be required to live in the greater Greensboro N.C. general area.
