

## Want to improve hygiene and increase production time?

Implementing automated open plant cleaning in your poultry processing plant will optimize your production, increase shelf-life and reduce operational costs. We offer automated solutions for a wide range of processing equipment - designed to meet your requirements.

### CASE: Optimizing on cleaning and hygiene with automated solution

For one of the world's largest poultry processors, the installation of System Cleaners automated cleaning solutions in their primary processing plants has resulted in:

- 50-75% reduction in cleaning staff
- 40-56% reduction in cleaning time
- A consistent cleaning result creating added brand value

[Read more about it here](#)

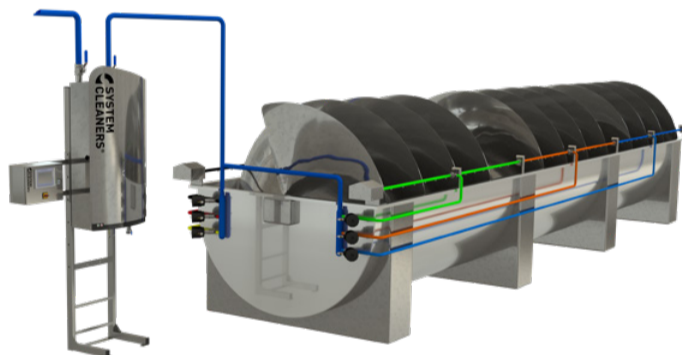

### The benefits of automated cleaning

Many poultry processors lose valuable production time and suffer from an inconsistent product quality due to an inefficient cleaning process. The result can be reduced product output and damage to your brand.

With an automated cleaning solution from System Cleaners, you will get several benefits:

- Reduce cleaning time = increase production time = increase output
- Reduce water and chemical consumption
- Less wear on processing equipment and affected surfaces
- Increase employee safety  
Avoid labor shortages

### Creating customised solutions is at the core of our business

We offer a wide range of solutions customizable to match the processing equipment and conditions of the processing environment. Mapping out the cleaning process based on the equipment construction and determining the optimal segmentation of the process is one of our core competences.

Ensure high ROI with System Cleaners  
AUTOMATIC CLEANING SOLUTIONS

### ABOUT SYSTEM CLEANERS

*System Cleaners is the globally leading manufacturer dedicated to boosting hygiene around the world by means of strong cleaning solutions for the food and beverage industry. Our goal is to enable you to trust what you eat and drink through high-quality OPC solutions and competent, skilled and straightforward guidance in finding the solution that matches your specific requirements and challenges.*
