

M.G. Newell is a full-service provider of sanitary equipment for the food, beverage, pharmaceutical and personal care industries, providing superior products and customized solutions since 1885.

We start with a solid foundation – SERVICE! M.G. Newell is a leader in providing unparalleled service to sanitary processing industries. We have achieved this through our extensive experience and total focus on the needs of our customers. We stay attuned to your needs throughout every phase of our relationship with you. Your concerns are our concerns. Your problems become our problems. Ultimately, our expert solutions and service become your plan for success.

FULL-SERVICE DISTRIBUTOR

- Pumps, valves, fittings and tubing
- Fluid and material handling systems and components
- General plant supplies and parts
- Heat exchangers, mixers
- Instrumentation
- Homogenizers, separators
- Scales, filtration, strainers

Newell Automation

We understand the purpose behind the process. Working along with our process engineers, our controls team will identify the appropriate instrumentation and control functionality for your process. From conceptual design to installation and start-up, our engineers and technicians will develop and validate a system that meets your requirements.

SILVER
System Integrator
A ROCKWELL AUTOMATION PARTNER

- PLC design and programming
- HMI design and programming
- UL508A Control panel design and fabrication

CUSTOM DESIGN, FABRICATION & INSTALLATION

Engineers and technicians design, customize and build equipment for all sanitary processing requirements including new greenfield installations, skid-mounted systems, valve clusters, flowverter panels, hot water sets and holding tubes.

Skidded systems for:

Inline blending	Temp Control
Heat exchange	Pasteurization
CIP/COP	Mixing
Filtration	Batching

CALIBRATION AND MAINTENANCE SERVICES

Field technicians conduct instrument repair, preventive maintenance, calibration of existing equipment and assist in the start-up of new, on-site installations.

As an SPX Certified Repair Center, we are one of a few distributors to complete their rigorous program requirements. Our technicians are qualified to disassemble, evaluate, and rebuild WCB and APV pumps and valves.
