We Make It Work Better.

M.G. Newell is a **full-service provider of hygienic solutions** for the bio-tech, pharmaceutical and other sanitary processing industries. We partner with customers to design and fabricate cost-effective, customized systems to fit their requirements. Our goal is to provide a solid experience; streamlining your project utilizing our engineering, design, fabrication, automation and installation capabilities.

Our customers represent the world's largest manufacturers of parenteral and solid dose pharmaceuticals, personal care products, OTC medicines, testing kits, and more. To help them meet consumer expectations, we strive to support their goals of hygienic processing from start to finish.

Functional safety and reliability are not theoretical product advantages – we know they are essential properties in life sciences applications. Therefore, our engineers build sanitary design into every system, from pump carts to WFI loops to valve clusters to process filtration systems to new greenfield installations.

Our **Newell Automation** controls team will identify the appropriate instrument and control functionality for your process. With automation hardware, software controls, control panel design and fabrication, we provide turnkey solutions for CIP, batching, blending and other processes.

Optional designs are available to meet
NEMA-4 and/or explosion-proof
environments.

Our systems meet and often exceed
compliance to FDA and ASME BPE standards.

Skidded systems offer faster time to market, higher quality fabrication and provide flexible, efficient use of space.

Process filtration skids
Ingredient distribution skids
Viral inactivation skids
Media and buffer systems

Tanks and vessels are configured to meet ASME BPE design and construction.

Single-wall or jacketed tank designs

Fully customizable layouts

Various agitation options available

Electropolishing and passivation available

Single or multi-tank systems.

CIP/COP skids

Acid and caustic distribution skids

USP WFI & PW distribution skids

Fermenters

Aseptic systems

Ultrafiltration (UF) skids

Buffer prep & distribution

Fabrication of clean room quality stainless steel platforms, floor grating, stairs and handrails.

Non-slip flooring and grates
Stair treads and covers
Ladder rungs and covers

Our engineers incorporate user-friendly design into every system—all while meeting your budget.

General Arrangement Drawings

Piping & Instrumentation Diagrams

3D Solid Works Modeling/Drawings

Construction Drawings

As-Built Drawings

Clean steam
Skidded utility sets
Temperature control modules
Utility filtration skids
Stainless steel In-line water heaters

Precise temperature control

Energy efficient

Batch and continuous processing

Process monitoring and control

Single-use systems and controls

Ergonomically designed for loading and unloading bag and tube sets

Single-use automation and sequence programming

Valve clusters

Liquid degassing and gassing systems

CO₂ and O₂ measurement

Greenfield and upgrade
installations

Custom engineered designs

Isometric piping diagrams

Our experienced installation teams communicate and work effectively with your plant personnel.

Material Test Reports

Electropolish certificates

Weld log/data Sheets

Weld mapping

Digital weld video reports

Piping and Instrumentation Drawings

PLC design and programming
HMI design and programming
Control panel design and fabrication
Audits and retrofits

Delta V control panels

UL-508A Certified Panel Shop

Panels meet NFPA, NEC and UL-508 regulations

NEMA 4x and explosion proof panels optional

Factory and Site Acceptance testing
SCADA systems

Rockwell Automation Recognized System
Integrator

SILVER
System Integrator
A ROCKWELL AUTOMATION PARTNER

Working along with our process engineers, our controls team can identify the appropriate instrumentation and control functionality for your process.
