Newell Automation

We Make It Work Better.

Newell Automation is a full-service provider of industrial UL-508a control panels, operator-control systems, PLC design and fabrication, programming and other customized services.

We understand the purpose behind the process.

Newell Automation can develop a customized solution not only to complete your automated process, but also improve the way it works. Our controls engineers will work with you to identify the best instrumentation and control functionality for your process. From concept and integration to installation and troubleshooting, our engineers will develop and validate a system that meets your requirements.
